* Based upon overall appearance Survey conducted Feb 2019 with 64 x UK Homeowners.

A warm, cosy space throughout the seasons

10 year guarantee

Engineered to postcode

Fast to build for less disruption

The lightest tiled roof on the market – only 38 kg/m²

Elevated vaulted ceiling

Unrivalled thermal efficiency – U-Value of 0.12

Building Regulation compliant

Transform your conservatory

Transform your conservatory into an everyday room that is consistently the same temperature as the rest of your home.

Whether you're simply replacing your conservatory roof, upgrading your window frames too or completely re-building your conservatory, Ultraroof is the ultimate solution and preferred by 8 out of 10 homeowners vs leading competitors*.

Lightweight and structurally sound

With a tiled roof, it is important to consider the exact location in which it will be installed and that the extremes of weather are taken into account during the design process.

Ultraframe's specialist software ensures that every Ultraroof is structurally engineered to withstand the worst potential wind and snow loads for your specific full postcode – providing you with complete peace of mind, whatever the weather.

After a heavy snowfall, snow places considerable weight on the roof and this will be less likely to melt on a highly thermally efficient tiled roof than it would be on a glazed conservatory roof.

It is vital, therefore, that the original glazing bars that were designed for glass are removed and that the roof is lightweight, so the frames are not overloaded and are able to withstand the weight of the snow.

Create a stunning home extension

Bringing plenty of light into adjoining rooms, Ultraroof is the ideal roofing system for your home extension.

Ultraroof's stunning interior features an internal pelmet which is the perfect place to house downlights or speakers. Plus, no matter what style or shape no tie bar is required. This means that the interior will always feature an uninterrupted vaulted ceiling, which further adds to the sense of space.

On the outside, Ultraroof can be personalised with a decorative cornice, an external soffit, and a choice of lightweight slate or shingle effect tiles. You can even use real tiles to match your house with Ultraroof.

Super strong for grand designs

Ultraroof is designed for large spans of bi-fold doors and can span up to 4m unsupported. The integrated full length glass panels in the roof ensure your extension and any adjoining rooms are flooded with natural light, or if you prefer, Velux windows can be added.

Ultraroof®
By Ultraframe

Metrotile

Available in 3 colours, these metal tiles have a shingle effect

Ultraroof Slate

Available in 3 colours, the tile starter strip provides an authentic slate look

Expandable panel

The expandable Ultraroof panel expands to fill any gaps in the roof to prevent cold spots

No tie bar

Ultraroof creates a beautiful vaulted ceiling and never needs a tie bar required

Bi-folds doors

The Ultraroof beam is strong enough to accommodate large sets of bi-fold or sliding doors up to 4m without additional support

Framework

Combining the best of timber and steel construction technology, the framework is engineered to postcode, ensuring all critical load points in the roof are built to withstand extreme wind and snow loads for your specific postcode

Ridge

Fully insulated ridge

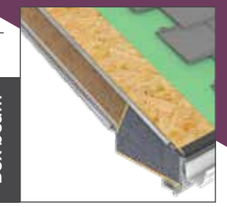

Glazing

Full length glazing

Hips

Slimline aluminium hip and ridge cappings

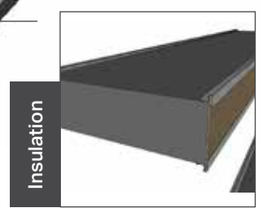

Box beam

Fully insulated box beam eliminates the risk of condensation

Pelmet

Internal pelmet for downlighters and speakers

Insulation

Structural insulation within the timber and steel Ultrapanel helps the roof deliver a U-Value of 0.15 (as low as 0.12 if required)

Soffit

External soffit (A variety of widths available)

Complete peace of mind

In order for your tiled roof project to run smoothly and on schedule, you need a roof you can trust.

Ultraroof is fully tested and compliant to both Building Regulations and the latest fire safety standards. Not only this, but Ultraroof is also the fastest to build and the most thermally efficient tiled roof on the market.

Fastest to build

Because Ultraroof is precision engineered and pre-manufactured to your specifications there is no cutting, trimming or battening required. Put simply, this means less mess and disruption for you as Ultraroof is built much faster than other systems or a traditional roof.

Fire tested

Independently and fully fire tested

- Components AND complete structure both fully fire tested.
- **Fire test certificates** available online
- **Fire rated as B-roof** according to EN 13501-5: 2016
- **Fire rated as AC** according to BS476-3:2004
- Metrotile achieves an AA fire-rating when tested according to BBA certificate 07/4470

Warmest

- Retains warmth in winter
- Keeps your room cool on a hot day
- U-Value of **0.15,** option to reduce to 0.12 if required
- **Complete warm roof system**, with no cold bridging
- **Fully insulated** 380mm structural beam

FASTEST
Faster to fit than any other solid roof

FIRE TESTED
