CUSTOMER NOTE: Please carefully read the Livinroof System Overview Guide before filling in order details.

How to place an order for a Livinroof

LEFT ELEVATION

1. Fill in above information and sketch plan and elevations showing position and dimensions of walls, brick piers, windows, doors, cut outs and intrusions. If necessary, attach photos of existing property.
2. Advise of the preferred position of any roof vents, rainwater pipes (RWP), tie bars and any additional information that may assist in specifying your order. If a Goalpost is needed, please complete page 3 of this order form.
3. A confirmation drawing will be created using our bespoke software and sent to you via email for you to check and sign. This will start the manufacture process. A delivery date will be emailed back as soon as it is scheduled.

Ultraframe are committed to not only offering the very best products but the best Customer Service experience. If you have any questions, queries or concerns please feel free to contact us on **01200 452 904** or email us on roofsales@ultraframe.co.uk and we will help any way we can.

If you have a technical question relating to our products, please contact our technical team on **01200 452 918** or email us on techsupport@ultraframe.co.uk.

You can also find technical help or any of our product literature on our website <https://trade.ultraframe-conservatories.co.uk/trade/media>

Please refer to the Livinroof Technical Guide.

IMPORTANT NOTE 1

The installer is responsible for ensuring that where Livinroof is supported by means such as timber/PVCu frame walls, the structure provides enough lateral support and resistance to wind uplift. Further guidance can be obtained through our system overview. Ultraframe cannot be responsible for the structural adequacy of any existing building work used as part of an overall conversion. While assistance is provided, ultimate responsibility to secure Building Regulations / approvals lies with the retail installer.

IMPORTANT NOTE 2

U-Design is the final arbiter on price and specification decisions.

IMPORTANT NOTE 3

The Livinroof components have been designed and manufactured to meet the specification of each individual job. Any significant on site modifications particularly relating to the repositioning of any structural members will invalidate the product's warranty and compromise the structures integrity. If adjustments are required due to site conditions please consult Ultraframe. Tie Bars / Tie Beams will be specified by Ultraframe and will appear on your confirmation. Always check the confirmation carefully.

Disclaimer:

Ultraframe does not take responsibility for the structural stability of the entire structure, only the products provided by Ultraframe. To ensure the rest of the structure is suitable, it is the installers responsibility to ensure that all walls, foundations and building structure are compliant with Document A of Building Regulations. Any adjoining window frames must be a minimum of 70mm reinforced PVC frames, coupled in accordance with the manufacturer's recommendations. Host walls must be suitable to take the additional load and forces of the new building.

All beam end plates (WP and SP) must be bolted to a suitable substrate with adequate anchors. For the WP, the host wall suitability to accept the increased forces must be checked. The SP should be positioned on a suitable concrete padstone built into the supporting wall and strapped down to at least two additional courses.

Baseplates must be anchored using a minimum of 3no. M12 through bolts (minimum 6kN Tension/Uplift capacity per bolt). Foundations or floor slabs must be designed to accept the additional forces.

Order Form

Tick this box if you would like to order hup! walls with your roof

hup! Wall Specification:

1. Footprint

Please draw the footprint of your building marking each elevation A, B, C, D etc. You should **use the base datum** which lines up with the external of the Ultrapanel clips - wall finishes and battens will overhang the base. See specification guide for more details.

Extended Base Tray required?

Width of Cavity wall 300mm. See page 34 of Specification Guide for more details

Please note hup! walls will protrude at least 48mm (3mm for membrane and clips, 25mm for battens and 20mm for claddings) outside of your base so that the wall finishes (claddings) will be ventilated. All critical dimensions will be confirmed before order stage.

Order Form

2. Elevations

Please draw each elevation of your hup! walls marking the elevations clearly with A, B, C, D etc. Include window and doors sizes and distance from the eaves as well as the floor clearly.

Tick this box if you require the cable management panel which is supplied on all panels above 560mm.

Order Form

3. Wall Finishes (Claddings)

Please tick the box to confirm which elements of the walling kit you will require to be supplied by Wendland

None - I am supplying my own

Ventilation trim only

Aperture trim only

Batten kit (includes battens and fixings)

Render Board kit (includes ventilation trim, aperture trims and battens)

Brick Mesh (includes trims, battens and render board)

Brick Mesh Specification:

Grey Brick/Medium mortar

Multi Buff/Medium mortar

Warm Buff/Medium mortar

Terracotta/Medium mortar

Multi Red/Medium mortar

Multi Orange/Medium mortar

Grey Brick/Light mortar

Multi Buff/Light mortar

Warm Buff/Light mortar

Terracotta/Light mortar

Multi Red/Light mortar

Multi Orange/Light mortar

Grey Brick/Grey mortar

Tick this box if you need soldier courses above every window and door where there is space under the eaves.

Surveyor's Details

For the next 6 months, we will discuss every hup! order with the surveyor to ensure that it has been specified correctly, and therefore, avoid any potential errors on site. Please include your surveyor's details below.
