STYLE OPTIONS

Width W: mm

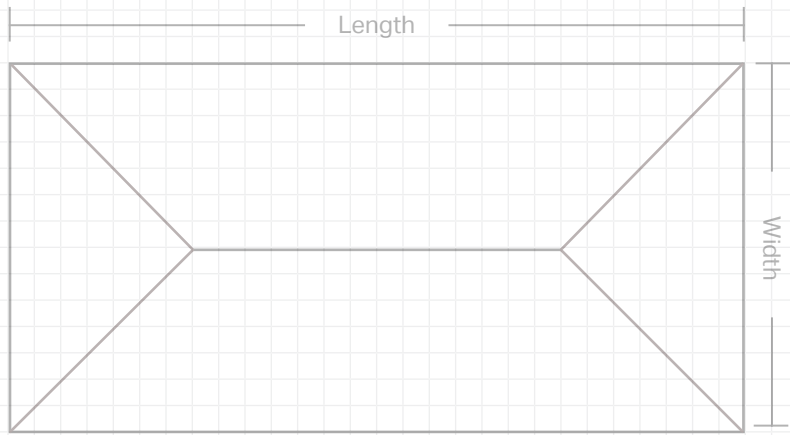

Length L: mm

Width (W) & Length (L) dimension to outside of timber support frame

SKETCH OF DESIGN (EXTERNAL VIEW)

Use the template to draw the desired rafter layout of your roof design giving your dimensions in millimetres

We will use 0.6kn/m² to calculate the snow loading on this roof, if you need this changed please let us know.

STYLE

- Pyramid Style 4
 Style 1 Style 5
 Style 2 Style 6
 Style 3 Style 7

If a lantern style is not selected, then we will quote for the style with less bars.

 with Pole - Brass Med
 with Switch
 with Thermostat

GENERAL INFORMATION

- Roof Pitch Fixed 20°
- 24mm glazing in all lantern roofs
- All lantern roofs are supplied with Aluminium external glazing bar cappings and castings
- Lead time for orders: 8 - 10 Days
- Any 4 way lanterns bigger than 1.5m x 1.5m are limited to use in snow load areas of up to 1.07kN/m²
- Lengths up to 6m and widths up to 3m – see matrix for configuration details.
- Suggested timber support to be 100mm wide by 150mm high (not supplied with lantern roof). External Face of Timber Support.
- For optimum aesthetic appeal use Width W x 1.5/2/2.5 etc to obtain Length L (e.g 1400mm W x 1.5 = L 2100mm)

The Stratus Lantern roof has been specifically designed to be fastened down to a structurally supportive upstand in a flat roof situation. It is the sole responsibility of the installing company to make sure the supporting superstructure is designed to resist the lateral loads imposed by the Stratus Lantern. We reserve the right to alter specifications and descriptions without prior notice as part of our policy of continuous development. E&OE. Version 2.
