

Ultraframe (UK) Ltd

Environmental Policy Statement

ultraframe
Transforming light and space

Ultraframe (UK) Ltd recognises its responsibility towards preventing pollution and minimising its impacts on the environment within which we live and work.

This policy statement sets out the framework on which our Environmental Management system is based.

All employees must be aware that our business activities have the potential to impact the environment and therefore it is a moral duty and legal responsibility to manage these impacts in a structured Environmental Management System.

Ultraframe (UK) Ltd will do this by:

- Establishing an Environmental Management System to the specifications outlined in the international standard ISO 14001.
- Setting and reviewing environmental objectives, targets and management programmes.
- Implementing an internal audit system to ensure compliance with all relevant environmental legislation and to identify areas for continual improvement.
- Planning new processes and facilities to minimise environmental impacts.
- Reducing the environmental impacts relating to manufacturing through manufacturing design methodologies and continual improvement activities.
- Providing training for employees directly involved in the administration of the environmental policy and provides the appropriate awareness training to all employees to harness their ideas and suggestions for improvement.

Ultraframe (UK) Ltd is committed to the cause of pollution prevention and sustainable resource use and will take all necessary steps to adhere to this. We involve employees in our environmental programme and provide necessary training to enable them to perform their responsibilities successfully.

This policy is publicly available, has been communicated throughout the Company and is available to all Ultraframe (UK) Ltd interested parties, customers and suppliers upon request.

This Policy is subject to review, monitoring and revision by:
