

# Flatroof

By Ultraframe

OSB deck

Pre-cut tongue and groove OSB provides an even surface for the roof covering.

Soffit options

Choose a standard soffit of 36mm or the extended 240mm soffit.

Fascia

Choose from 4 attractive fascia designs.

Insulated Ultrapanel

BBA approved technology forms a super-strong i-beam structure and insulates the roof.

Vapour control layer

Prevents condensation and moisture build up within the roof structure.

Insulated kerb

Building Regulation compliant kerb for lanterns and skylights.

Rooflights options

Lantern

Flat Skylight

Available with a choice of lanterns or flat skylights.

Intermediate insulation

Earth wool provides increased thermal performance to a low 0.12 U-Value overall.

Adjustable pitchlocks

Simple to use, pitchlocks ensure water drains from the roof.

Insulated ring beam

The lightweight beam does not require heavy lifting equipment

Large doors

The Flat Roof is strong enough to span up to 5.6m above bi-fold or sliding doors.
