

# System Accreditation

## Certificate

# Ultraframe

This accreditation confirms that MFA, an independent Registered Building Control Approver has reviewed and endorsed the below list of Ultraframe systems to its standard, defined specification as manufactured. This is based on MFA's thorough technical assessment, and independently verified test reports which indicate the system meets the functional requirements of the prevailing building regulations. The accreditation relates solely to the product specification as it leaves the factory and does not extend to on-site installation or the performance of individual installers, individual projects still requiring building control oversight.

*\*Installation of products must be to the manufacturers specifications and require individual project oversight by Building Control.*

1. Livin Roof
2. Ultra Roof
3. Glass Roof
4. Flat Roof
5. Ultrarroof Tile
6. HUP Wall System
7. HUP Base System\*\*

*\*\*Subject to suitable ground conditions*
