Internal	☐	☐	☐	☐	☐	☐	☐	

GLAZING

☐ 24/25mm

☐ 35mm (the glazing in the vent will be 24/25mm)

ROOF VENTS AND MECHANISM (mark plan)

Brass ☐ Manual Spindle ☐ Manual Spindle and pole ☐ Manual Spindle and telescopic pole

Chrome ☐ Manual Spindle ☐ Manual Spindle and pole

☐ Electric motor with digital thermostat and rain sensor

☐ Electric motor and rocker switch

☐ Electric motor with radio and remote control

☐ Electric motor with thermostat (AVTD002)

☐ Electric without switch/thermostat (Motor only)

DISCLAIMER

For kerb widths 70mm to 100mm, a full length vent it is only compatible with the Electric Motor. You cannot have a Manual Mechanism at all, because on all kerb widths the manual winder clashes with the internal of the kerb. Where the kerb width exceeds 100mm, you cannot have the full-length roof vent/vent extender at the bottom because both manual and electric motor will clash with the kerb.
