

# Ultrarroof380 Armadillo Installation

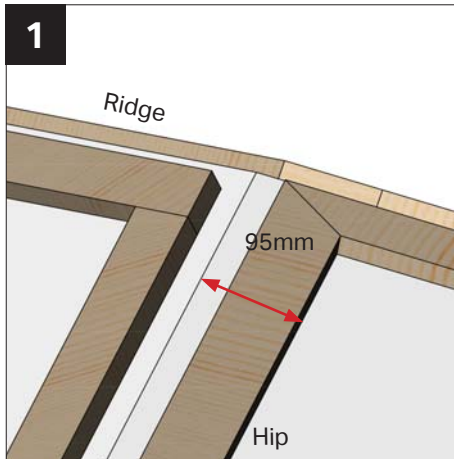

The complete guide to installing Armadillo onto an Ultrarroof380.

**PLEASE READ BEFORE FITTING**

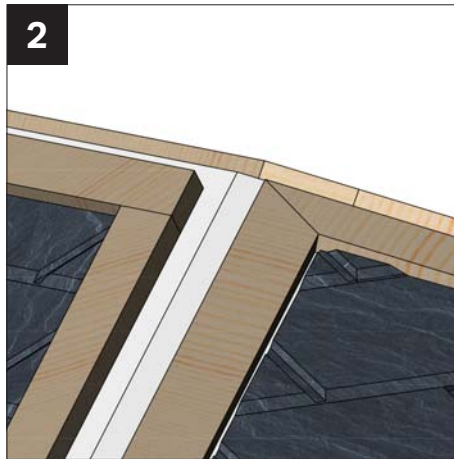

## ARMADILLO PRE INSTALLATION INFORMATION

# ARMADILLO INSTALLATION ON ULTRAROOF380

Mitre and fit tile battens over felt. These should be positioned at 95mm from hip/ridge centreline to the outside of the batten (see illustration in main guide)

Fit battens on facet as per guide before fitting hip tiles.

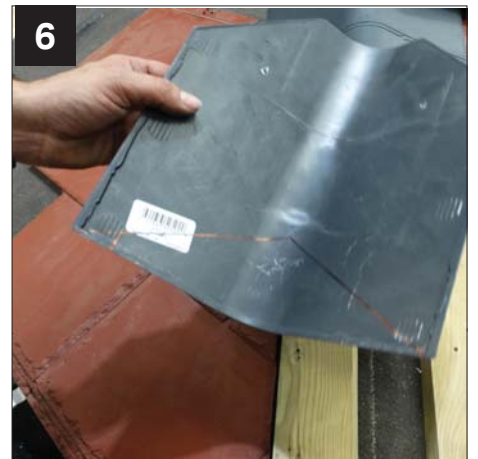

Place the straight edge of a hip tile on the starter tile.

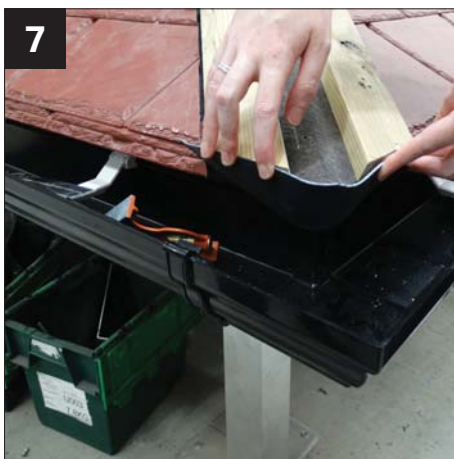

Mark the inner face of the hip-tile in line with the starter tile.

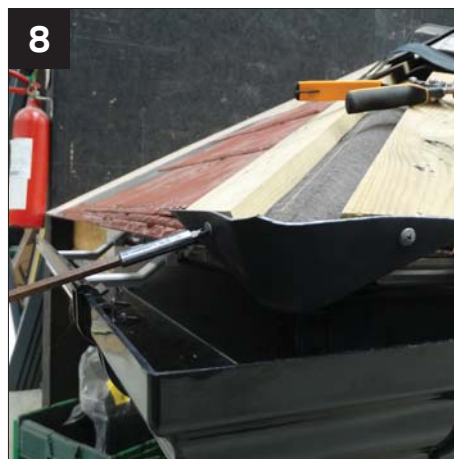

Connect the marks at the edges to the middle.

This will result in a triangular shape. Cut along the lines to produce the hip end stop.

Offer up the triangular end stop to the hip battens with the straight edge at the bottom.

Fix the triangular end stop to the battens.

To form the last tile at the bottom of the hip. Place the tile in position.

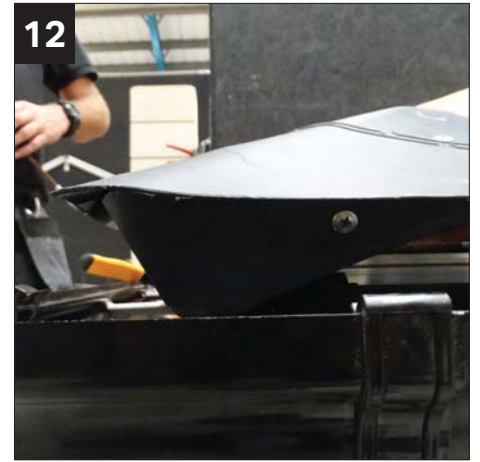

# ARMADILLO INSTALLATION ON ULTRAROOF380

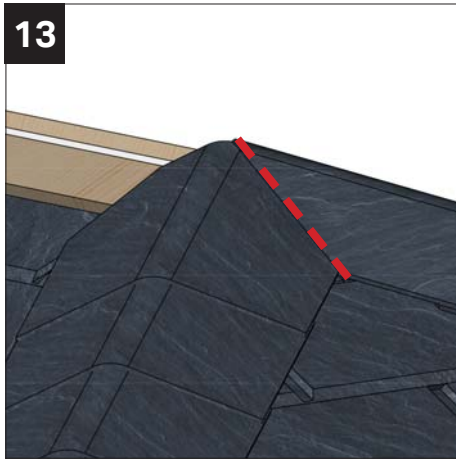

10 Mark the position of the edge of the tile starter on the hip tile at the outer edges and in the middle/

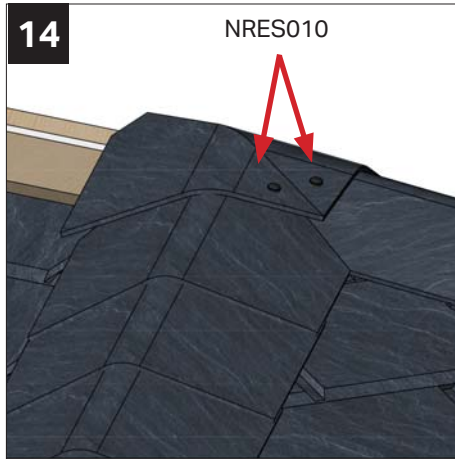

11 Cut along the lines on the hip tile and fix to the battens on the hip.

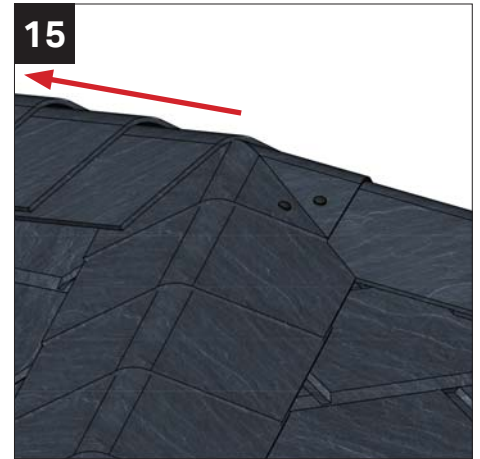

12 The hip tile is closed off by the end stop.

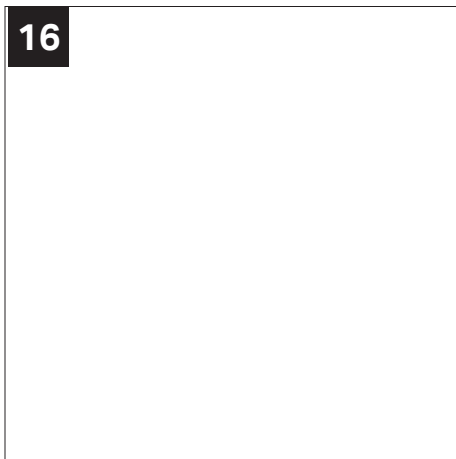

13 Fit hip tiles as shown in guide, scribing in at the finial where indicated in red.

14 The uppermost hip tiles should be fixed using NRES010 capped screws where fixings will remain visible (see image).

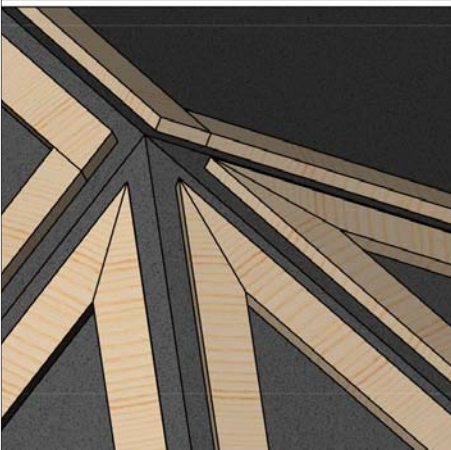

15 Fit ridge tiles starting at finial point and working rearwards as shown.

16 This is how the finished installation should look at the finial.
