

hup! brick slips and stone slips

Brick and stone slips are now available to order directly with your hup! system. Alongside ordering your hup! walls and rails system, you can now include brick or stone slips as part of the same, streamlined order, making the process simpler and more efficient.

The standard rail system from hup! is designed to accommodate 20mm brick or stone slips. If you choose 14/15mm slips you will be supplied with a different rail system, designed for the slimmer bricks.

Ultraframe do not provide a colour matching service and only the shades in this brochure will be supplied directly from Ultraframe. Should you wish to source different bricks and these are slimmer than 20mm, you should inform your installer/Ultraframe, to ensure the correct rail system is specified. The rail system is not suitable for use with sand and cement mortar.

hup! brick slips

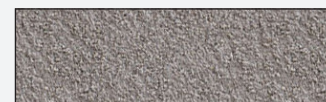

The mortar provided is a lime-based mortar which we recommend for use with the rails. The shades of mortar available with our brick slips are White, Natural Grey and Sandstone.

To order any brick slip samples or for a colour matching service, please email sales@hupbrickslips.co.uk.
